

VirusTotal — Scan Report

VaultKeepR for Android — version 1.8.5 (versionCode 38)

1 / 75 engines flag this file (66 clean)

Identified detection: AhnLab-V3 flags PUP/Android.Malct.518314 — a "PUP" (potentially unwanted program) heuristic specific to this engine. Major engines (ESET, Kaspersky, Microsoft, BitDefender, Google, CrowdStrike, Avast, AVG) detect nothing. This isolated-detection pattern is a common false positive on out-of-store Android packages (NFC usage, background services, non-marketplace signing).

File

Name	app-release.apk
Type	Android
Size	101.04 MB
SHA-256	363cc0a14e10b49ee289ef62987080e2a58ddaeb668303b50acc63ad12cdcf39
